FIBER MATERIAL

DIA104/DIA79 x 101 mm

CORDIERITE MATERIAL

DIA100/86 x 230 mm

Supports • Batts • Beams for the roof of the kiln • Double layer batts

We produce all the special format for the roof of the kiln. Most of the producers of the kiln are our kind costumers.

These are our 2 standard qualities:

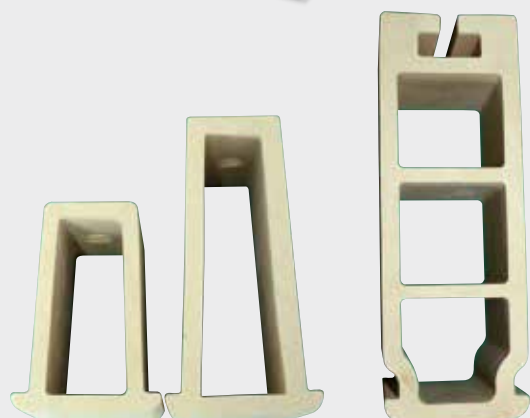

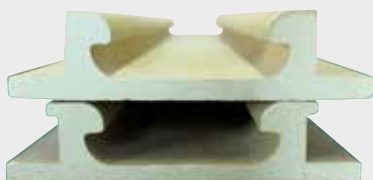

- Cordierite/cordierite mullite T° 1250°C
- Cordierite mullite T° 1350/1380°C

We have all the material in our warehouse or we are able to propose you short time of delivery.

Thanks to our great production and our warehouse with hundreds of different sizes we can propose the right solution for you in very short time.

Our products are original and made in Italy and we can supply all the type of kiln.

We have been at the service of the industry for 40 years.

In the picture you can see a sample of a roof vault. The structure is in cordierite mullite refractory and a T° of exercise of 1350/1380°C.

Roller Passages

We produce roller passages in two different qualities: cordierite and mullite.

The difference between the 2 quality respect the use in different parts of the kiln.

With more than 120 drawings we are sure to find the roller passage you need in your kiln.

Great abrasion, deformation resistance and maximum dimensional precision are our target for the quality of the products.

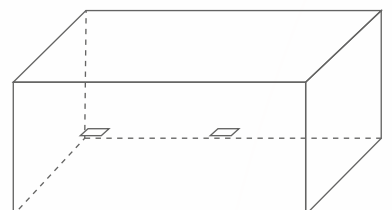

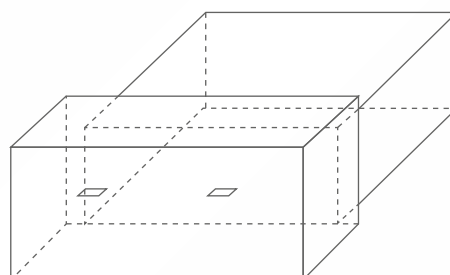

It is simple to produce... difficult is to produce well.

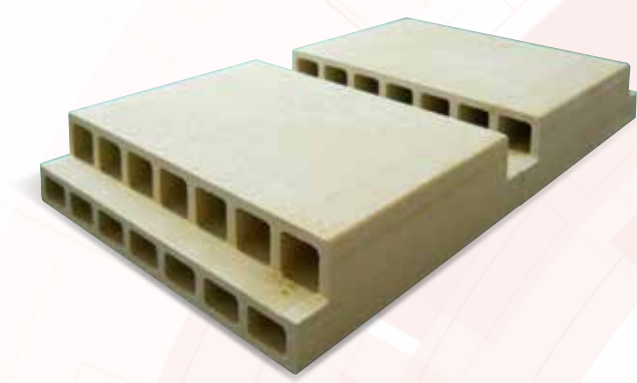

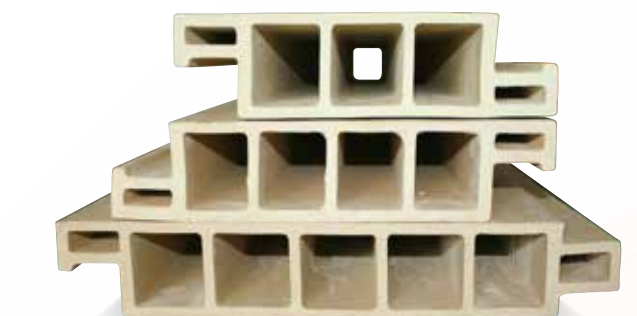

Inspection Plug

They are produced in insulating material of in fiber

We produce even the U support for the Inspection plug.

Our products are original and made in Italy and we can supply all the type of kiln.

We have been at the service of the industry for 40 years.

All the productive process follow the quality parameters of our great costumer.

We can propose all the spare partsfor the driving system. All original material made in Italy

Silicon Carbide

We propose:

- Burner
- Blower up
- Beams

Several hundreds of drawing of burner to propose to you!

Blower up in Sic material or in Mullite material.

Dear costumer,

all these products are Refrattari Speciali's proposal for the correct maintenance and restoration of the rollers' kilns.

A life of work side by side with the big and little kiln constructors give us the competence and the cure we use with our products and give you the certainty and the safety that we are prepared to obey to your ordinary and extraordinary needs.

We are able to propose you all you need from the ordinary maintenance (chicane, thermalcouple, spring) to the complete restoration of the kiln.

If we are ready it is because in these long years of work we made different experiences both in production in our factories and at your side trying to satisfy your requests.

All the products are of first quality and give you the guarantee of our philosophy of work:

***"The best for the best,
with the best"***

Thanks to the 960 factories in 49 countries around the world that honour us of their orders and attentions.
